DURATION	36 min · 8 modules · self-paced
FORMAT	Audio-narrated slide chapters with synchronized progress tracking. Interactive end-of-course Markdown builder you take to the next meeting. Free verifiable certificate on completion.

PREREQUISITES	No technical prerequisites. The material is written for business decision-makers and assumes only general business literacy.

Course Outcomes

- 1 The CDO mandate doubled when AI landed — headcount rarely did. Three boundary fights with the CIO, CTO, and CISO, and three resolution patterns that work
- 2 A minimum-viable-data-foundation filter that separates the data work that unblocks AI from the data work that doesn't
- 3 A three-pillar RACI with the CISO and CRO that holds past month six — with one R per pillar to prevent the committee-freezes-and-shadow-AI-begins pattern
- 4 Three-horizon investment allocation with CFO-defensible framing — neither data starves AI nor AI starves data
- 5 Vendor management across four overlapping categories — and the 4-vendor trap with the working 2-3-strategic-vendor pattern
- 6 Four board KPIs that survive 12 months of director scrutiny — and four activity metrics to retire
- 7 A three-tier delegation model + four-rhythm operating cadence that keeps the CDO from becoming the bottleneck
- 8 A one-page CDO-CIO-CISO joint charter + 4 trust trip-wires + interactive charter builder
