AB-100: Architecting Agentic AI Business Solutions

Self-paced course for the Microsoft AB-100 certification. Master agentic AI architecture with Copilot Studio, Azure AI Foundry, and Dynamics 365.

Course Overview

A comprehensive 13-chapter course covering everything you need to architect agentic AI business solutions — from analyzing business requirements and developing AI strategy to designing solutions, orchestrating prebuilt agents, and managing governance. Includes a 50-question mock exam matching the real AB-100 format.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Solution architects

2

AI developers

3

Power Platform
developers

4

L&D · internal trainers

Learning Outcomes

- 1 Master the Microsoft AB-100 exam objectives — agentic AI architecture, Copilot Studio, Azure AI Foundry, Dynamics 365 integration
- 2 Analyse business requirements and translate them into agentic AI solution designs — the architect's decision framework
- 3 Develop AI strategy with executive sponsors — capability mapping, capacity planning, capital allocation
- 4 Design solutions with the right pattern — topic vs generative, plugin vs agent, when to extend vs orchestrate
- 5 Orchestrate prebuilt agents (Sales, Service, Finance) and custom agents in one coherent business workflow
- 6 Manage governance at scale — environment strategy, ALM pipelines, monitoring signals, quality gates
- 7 Sit a 50-question mock exam that mirrors the real AB-100 format and difficulty

12-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

Introduction to Agentic AI

CHAPTER 1 · 90 MIN · NARRATED + INTERACTIVE

- The architect role, agentic AI fundamentals, and the solution landscape

02

Analyze Business Requirements

CHAPTER 2 · 100 MIN · NARRATED + INTERACTIVE

- Grounding, data architecture, and translating business needs into AI specs

03

Develop AI Strategy

CHAPTER 3 · 120 MIN · NARRATED + INTERACTIVE

- Cloud Adoption Framework, agent types, and solution design rules

04

Return on AI Investment

CHAPTER 4 · 100 MIN · NARRATED + INTERACTIVE

- TCO analysis, model router patterns, and ROI modeling

05

Design AI Solutions

CHAPTER 5 · 120 MIN · NARRATED + INTERACTIVE

- Responsible AI, Copilot Studio, Azure AI Foundry, and solution design patterns

06

Design Extensibility

CHAPTER 6 · 100 MIN · NARRATED + INTERACTIVE

- Connectors, plugins, MCP, Computer Use, and extending agent capabilities

07

Orchestrate Prebuilt Agents

CHAPTER 7 · 110 MIN · NARRATED + INTERACTIVE

- Dynamics 365 capability map and prebuilt agent orchestration

08

Analyze, Monitor, Tune

CHAPTER 8 · 110 MIN · NARRATED + INTERACTIVE

- Telemetry, feedback loops, and continuous AI solution improvement

09

Manage Testing

CHAPTER 9 · 100 MIN · NARRATED + INTERACTIVE

- Prompt validation, multi-app E2E testing, and quality assurance

10

ALM for AI Solutions

CHAPTER 10 · 110 MIN · NARRATED + INTERACTIVE

- Application lifecycle management, data ALM, and custom model ALM

11

RAI, Security & Governance

CHAPTER 11 · 120 MIN · NARRATED + INTERACTIVE

- Responsible AI, security patterns, governance, risk, and compliance

12

Final Revision

CHAPTER 12 · 80 MIN · NARRATED + INTERACTIVE

- Cross-cutting frameworks, common pitfalls, and exam preparation
