Course Overview

For controllers, finance ops leaders, FP&A heads, CFOs past basic AI literacy. Eight chapters across the close-cycle surface: the close landscape (Gartner Q4 2025 67% adoption / 39% in close, KPMG 1.4-day median reduction, Hackett \$0.85 !' \$0.55 per \$1K revenue, Vic.ai/BlackLine/Trintech/FloQast/Copilot for Finance); variance narratives (KPMG 50–70% time savings, WSJ Aug 2025 confabulated-clause case, quote-or-cut rule); accrual proposals (85–92% accuracy on routine accruals, materiality threshold filter, judgement-accruals stay manual); reconciliation copilots (BlackLine/Trintech 35–50% manual hours saved, auto-clear threshold, exception flow); journal-entry AI (Big-4 acceptance condition: traceable source + human approves + audit trail, drafter/preparer/reviewer/approver quad-eye, SOX 404); SOX-friendly audit trail (3 controls: input control, output review, AI tool documentation, PCAOB QC 1000, IAASB ISA 220, EY 78% CFO concern); the quality framework (quad-eye principle, materiality threshold, quarterly accuracy review, Deloitte ACP 62% want disclosure); and the close — 2-quarter rollout playbook with interactive builder, 4 trust trip-wires, and the through-line: AI works with the controls, not around them.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Controllers · Assistant
Controllers

2

FP&A heads

3

CFOs

4

Accounting Operations
leaders

Learning Outcomes

- 1 AI-generated variance narratives — grounded in GL, drafted in seconds, reviewed by humans
- 2 Accrual proposals from AI — the 3-tier review framework that auditors approve
- 3 Reconciliation copilots — bank, intercompany, AP/AR — with the audit trail discipline
- 4 Journal entry AI — auto-draft + human approve + log everything for SOX
- 5 SOX audit trail design — the format external auditors and PCAOB inspectors want to see
- 6 The quality framework — accuracy, completeness, timeliness — with the controls that prove it
- 7 A 2-quarter rollout that compresses close timeline 1-2 days without losing control

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The close landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- Gartner Q4 2025: 67% of CFOs deploy gen AI, 39% in close.
- KPMG: 1.4-day median reduction at mature deployments.
- Hackett: \$0.85 !' \$0.55 per \$1K revenue.
- Vic.ai, BlackLine, Trintech, FloQast, MS Copilot for Finance.
- WSJ Aug 2025 confabulated-clause case (close held 36h).

02

Variance narratives

CHAPTER 2 · 4 MIN · NARRATED + INTERACTIVE

- KPMG GenAI Finance Pulse: 50–70% time savings on MD&A first drafts.
- WSJ confabulated-clause case (close held 36h).
- The 3-stage workflow: AI drafts !' controller validates every claim !' controller adds qualitative.
- Quote-or-cut rule.

03

Accrual proposals

CHAPTER 3 · 4 MIN · NARRATED + INTERACTIVE

- 85–92% accuracy on routine accruals (Vic.ai/Trintech) vs 60–70% junior baseline.
- AI proposes — controller approves — posting after approval.
- Materiality threshold filter (\$500K–\$1M mid-mkt, \$5–10M enterprise).
- Judgement accruals stay manual.

04

Reconciliation copilots

CHAPTER 4 · 4 MIN · NARRATED + INTERACTIVE

- BlackLine + Trintech 35–50% manual rec hours saved. 3 days !' 1.5 days.
- Auto-clear threshold (above 95% confidence + below materiality). 3-bucket exception flow.
- The bank-feed mismatch failure mode.

05

Journal entry AI

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- AI proposes JEs from source documents (invoices, contracts, wires).
- Big-4 acceptance condition (PwC/Deloitte/KPMG/EY 2024-25): traceable source + human approves + audit trail.
- Drafter/preparer/reviewer/approver quad-eye.
- SOX 404 angle.

06

SOX-friendly audit trail

CHAPTER 6 · 4 MIN · NARRATED + INTERACTIVE

- COSO ERM 2024 updates + SOX 404. 3 controls: AI input control, AI output review (quad-eye), AI tool documentation (PCAOB QC 1000 + IAASB ISA 220).
- EY 2025: 78% of CFOs concerned, 41% already changed procedures.

07

Quality framework

CHAPTER 7 · 4 MIN · NARRATED + INTERACTIVE

- Quad-eye principle.
- Materiality threshold (\$100K–\$10M depending on size).
- Quarterly accuracy review (20 entries, senior controller).
- Audit-committee disclosure (Deloitte ACP Q4 2025: 62% want disclosure, 31% want sample-testing).

08

Making it stick: your close AI roadmap

CHAPTER 8 · 4 MIN · NARRATED + INTERACTIVE

- 2 use cases
- 2 quarters
- 1 quality framework. Q1 = reconciliation + variance narratives. Q2 = routine accruals. 4 trust trip-wires: no AI signs the close, no unreviewed accrual posts, no untraceable source data, no "set and forget". Interactive roadmap builder.
