RevOps Automation with AI

A ~40-minute course for RevOps leaders — forecasting, pipeline hygiene, territory scoring, narratives, data, comp, tooling, two-quarter rollout — grounded in 2025–26 vendor evidence.

Course Overview

For RevOps leaders, Sales Ops, and CROs past basic AI literacy. Eight chapters across the full revenue operations surface: forecasting with prediction intervals (Salesforce State of Sales 2026 87% adoption, Microsoft Sales Agent 10% more meetings + 1.7 hrs/week, three failure patterns); pipeline hygiene with the 5 nudge-design rules (Salesforce Pipeline Inspection scoring 1-99, ZoomInfo +14pt close-rate + 11.5 hrs/week, Gartner "<40% of sellers will report AI improved productivity by 2028"); territory + account signal scoring (6sense Rithum 3× adoption + 58% of opps + 37% higher AOV, grandfather in-flight deals); analytics narratives with the click-or-cut rule (HBR workslop 41% / \$9M/year, Air Canada CA\$812 precedent, Einstein grounding); GTM data cleanup (continuous loop, identity resolution, \$12.9M/year cost, 22.5-30% B2B decay); comp modelling (CaptivateIQ Catalyst Aug 2025, Xactly Incent AI Dec 2025, Larkin HBS gaming risk, 3 stress tests); tooling stack decisions (Gartner MQ 2025 Salesforce/Microsoft/Oracle, M365 Copilot \$30 + Copilot for Sales \$50, the 3-question framework, 150K agents-by-2028 sprawl warning); and the close — a two-quarter rollout playbook with a 3-use-case builder and a data quality bar your CRO and CDO both sign off on.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

RevOps leaders

2

Sales Operations

3

Marketing Operations

4

CRO offices

Learning Outcomes

- 1 AI-augmented forecasting — what beats spreadsheet sandbagging at the Friday call
- 2 Pipeline hygiene with AI — surfacing stalled deals, missing fields, decision-maker silence
- 3 Territory + account scoring — two-layer ML + LLM with the data quality gate
- 4 Narrative generation for QBRs and exec updates — grounded, not invented
- 5 Data hygiene + entity resolution — the foundation that makes everything else work
- 6 Compensation modelling with AI — scenario planning, what-if exploration without breaking trust
- 7 The RevOps tooling stack — what to buy, what to build, what to consolidate
- 8 A 2-quarter rollout grounded in 2025-26 vendor evidence — not pitch deck claims

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

Forecast accuracy with AI

CHAPTER 1 · 7 MIN · NARRATED + INTERACTIVE

- Salesforce State of Sales 2026 (87% adoption), Microsoft Sales Agent eval (10% more meetings, 1.7 hrs/week saved).
- Three failure patterns: calibration drift, stale data, point estimate.
- Prediction intervals (Hyndman) beat point forecasts.

02

Pipeline hygiene automation

CHAPTER 2 · 6 MIN · NARRATED + INTERACTIVE

- Salesforce Pipeline Inspection (1-99 scoring, days-in-stage + push count), ZoomInfo Copilot (+14pt close-rate, 11.5 hrs/week saved, Seismic case).
- Gartner: <40% of sellers will report AI improved productivity by 2028.
- The 5 nudge-design rules.

03

Territory & account signal scoring

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- 6sense Rithum case (3x adoption, 58% of opps, 37% higher AOV), ZoomInfo MajorKey +16% + Simmers +20%.
- Grandfather in-flight deals.
- Re-score quarterly.
- Show the breakdown (firmo / intent / engagement) — not just the aggregate.

04

Sales analytics narratives

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- HBR workslop study (41% workers receiving it, \$9M/year cost per org), Air Canada CA\$812 precedent.
- Einstein grounding.
- The click-or-cut rule: every claim links to a record or it gets cut from the QBR deck.

05

GTM data cleanup with AI

CHAPTER 5 · 4 MIN · NARRATED + INTERACTIVE

- Bad data costs \$12.9M/year per Gartner.
- B2B contact decay 22.5-30% annually.
- Continuous loop (not annual project), identity resolution, AI-propose-confirm field completeness.
- The data layer beats the AI layer.

06

Compensation modeling with AI

CHAPTER 6 · 4 MIN · NARRATED + INTERACTIVE

- CaptivateIQ Catalyst (Aug 2025) + Xactly Incent AI (Dec 2025). 3x growth from frequent comp-plan revision.
- Larkin HBS gaming research. 3 stress tests: accelerator thresholds, quarterly cliffs, cross-product attribution.

07

Tooling stack decisions

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- Gartner MQ for SFA July 2025 (Salesforce/Microsoft/Oracle leaders).
- M365 Copilot \$30 + Copilot for Sales \$50 (bundled if you have Copilot Ent).
- The 3-question framework (CRM gravity, data quality, agentic roadmap) + the 150K agents-by-2028 sprawl warning.

08

Making it stick: your RevOps AI roadmap

CHAPTER 8 · 4 MIN · NARRATED + INTERACTIVE

- 3 use cases, 2 quarters, 1 data quality bar (duplicate rate <5%, decay <15%, push count tracked).
- Sequence: Q1 data cleanup + pipeline hygiene !' Q2 one predictive use case.
- Save comp modelling for year two.
- Interactive roadmap builder included.
