# AI for Operations & Supply Chain

A ~36-minute playbook for COOs and supply chain leaders. 6 plays, 3 anti-plays, the AI+OR principle, the data-stable filter, and 4 trust trip-wires. Voice: Andrew.

## Course Overview

For COOs, Chief Supply Chain Officers, VPs of operations, plant-and-network leaders, and demand planning + procurement + logistics + maintenance heads. Operational AI quietly compounds — customers don't see it, but every percentage point of working capital, every reduction in stock-out, every gain in efficiency flows straight to the P&L. Six plays that consistently ship: demand forecasting at SKU+location (hierarchical reality + FVA discipline), procurement automation (document AI + supplier matching + contract intelligence with 3-tier human-in-loop), logistics optimisation (the AI+OR principle — AI improves inputs, OR does optimisation), predictive maintenance (sensor + narrative pattern with the safety constraint that AI never eliminates inspection), inventory intelligence (dynamic safety stock + allocation + markdown timing), supplier risk monitoring (5 signal sources + 4-phase response cadence).

**FORMAT:** Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

## Who Is This For?

1

COOs · CSCOs

2

Supply chain VPs

3

Procurement leaders

4

Operations + logistics  
heads

## Learning Outcomes

- 1 6 operations AI plays that consistently produce measurable savings — forecasting, procurement docs, logistics, predictive maintenance, inventory, supplier risk
- 2 3 pitches that consistently disappoint — named explicitly so the budget redirects
- 3 The data-stable filter that decides which plays to start with in your specific operation
- 4 The two-layer demand forecasting model — what beats the median MAPE trap
- 5 The 3-tier procurement human-in-the-loop with audit posture
- 6 The AI-amplifying-OR framing for logistics — where AI augments operational research, not replaces it
- 7 The dynamic safety stock approach that solves stock-outs and overstock together
- 8 A 2-quarter roadmap with operational KPIs (procurement capacity, service level, working capital) — not AI metrics

## 8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

**01**

### The ops + supply chain AI landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- 6 plays
- 3 anti-plays
- the data-stable filter (data ready + process stable) that sequences your roadmap.

**02**

### Demand forecasting at scale

CHAPTER 2 · 5 MIN · NARRATED + INTERACTIVE

- The MAPE trap
- FVA discipline
- hierarchical reality
- 3 architectures (GBM
- hybrid
- DL)

**03**

### Procurement automation

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- 3 use cases (doc AI
- supplier matching
- contract intelligence)
- 3-tier human-in-loop
- audit + compliance posture.

**04**

### Logistics optimization

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- The AI+OR principle (AI improves inputs
- OR does optimisation)
- 3 use cases
- 3 failure modes
- dispatcher reality check.

**05**

### Predictive maintenance

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- Sensor + narrative pattern
- 3 components
- the safety constraint (AI never eliminates human inspection on high-consequence equipment).

06

**Inventory intelligence**

CHAPTER 6 · 5 MIN · NARRATED + INTERACTIVE

- Dynamic safety stock
- 3 use cases (safety stock allocation markdown)
- 3 failure modes
- 3-question honest scoring.

07

**Supplier risk monitoring**

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- 4 risk dimensions (geo climate cyber financial)
- 5 signal sources
- 4-phase response cadence

08

**Making it stick: your ops AI roadmap**

CHAPTER 8 · 6 MIN · NARRATED + INTERACTIVE

- End-to-end visibility reality
- 18-month rollout
- 4 trust trip-wires
- interactive Markdown builder for your COO + CSCO.
