Course Overview

For superintendents, heads of school, provosts, deans, curriculum directors, IT and academic affairs leaders, and the teachers + faculty who own AI deployment at the classroom level. AI in education succeeds when it augments teachers and supports learners — not when it replaces either. Six plays that ship: AI literacy as a discipline (4 components · age-appropriate sequencing from elementary through higher ed), AI tutoring + writing partner (with the supplement-not-substitute discipline), AI for educators (4 use cases that return time to teaching + the grading line), academic integrity in the AI era (3 pillars + 3-tier disclosure model · why detection-only fails), equity + access (3 benefits + 3 risks · the two-direction reality), privacy + safety (FERPA · COPPA · GDPR/DPDPA · 3 contract essentials · child-safety guardrails).

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

Learning Outcomes

- 1 The 6 plays that ship in education today — AI literacy, tutoring, educator support, integrity, equity, privacy
- 2 The 3 anti-plays that harm — AI replacing teachers, surveillance-heavy AI, autonomous high-stakes grading
- 3 The pedagogy-first filter — does this serve a learning objective, or did the vendor say it would help?
- 4 AI literacy as a discipline — 4 components at age-appropriate sequencing from elementary through higher ed
- 5 The supplement-not-substitute discipline for AI tutoring + the grading line for educator AI
- 6 3-tier academic integrity model — prohibited · permitted with disclosure · required — labelled per assessment
- 7 FERPA · COPPA · GDPR posture + the 3 vendor contract essentials + child-safety guardrails
- 8 12-month school/institution rollout with 4 trust trip-wires + interactive design-doc builder
