AI for Cybersecurity SOC

A ~36-minute SOC playbook for CISOs, SOC directors, detection engineering leads. 5 plays, 3 anti-plays, human-in-the-loop principle, AI's own attack surface, 12-month roadmap.

Course Overview

For CISOs, SOC directors, security operations leaders, and heads of detection engineering. AI in cybersecurity is an analyst force multiplier — not an analyst replacement. The best SOC in 2026 use AI to compress repetitive work so analysts focus on actual investigation.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Business + technology
leaders

2

Function heads +
transformation owners

3

L&D + internal trainers

4

AI-curious managers

Learning Outcomes

- 1 AI is an analyst force multiplier — not an analyst replacement
- 2 5 SOC plays — alert triage · detection augmentation · investigation · threat intel · automation
- 3 3 anti-plays — fully autonomous response, AI-only detection, AI as substitute for SOC maturity
- 4 Run alert triage with shadow review on suppressed alerts — false-negative rate is the truth indicator
- 5 Layered detection retained — signatures + rules + AI augmentation (never AI alone)
- 6 Apply verification discipline to AI threat intel — Mata cross-domain (hallucinated attribution is real)
- 7 Limit autonomous response to narrow reversible scenarios — broader requires human-in-the-loop
- 8 Defend AI's own attack surface — 4 attack vectors, 4 defensive patterns, including model behaviour monitoring

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The cybersecurity AI landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- AI is an analyst force multiplier
- not replacement
- 5 plays
- 3 anti-plays
- NIST CSF + MITRE ATT&CK + ISO 27001 frame.

02

Alert triage + noise reduction

CHAPTER 2 · 5 MIN · NARRATED + INTERACTIVE

- The volume problem
- 3 triage patterns
- 3 failure modes (historical bias
- over-suppression
- concept drift).

03

Threat detection augmentation

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- Layered model (signatures + rules + AI)
- UEBA in practice (60-day baseline)
- LLM-augmented analysis.

04

Incident investigation assistance

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- 3 investigation use cases
- human-in-the-loop principle absolute
- 3 failure modes.

05

Threat intelligence synthesis

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- The volume problem
- 3 intel AI use cases
- the verification requirement (Mata cross-domain).

06

Security automation + SOAR

CHAPTER 6 · 5 MIN · NARRATED + INTERACTIVE

- The automation spectrum
- 3 safe autonomous scenarios
- 3 dangerous ones requiring human-in-loop.

07

AI's own attack surface

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- When AI in your SOC becomes the target
- 4 attack vectors
- 4 defensive patterns.

08

Making it stick: your SOC AI roadmap

CHAPTER 8 · 6 MIN · NARRATED + INTERACTIVE

- 12-month rollout (triage
- investigation
- detection
- intel + SOAR)
- 4 trust trip-wires
- interactive Markdown builder.
