Course Overview

For agency heads, government CIOs, Chief AI Officers in public-sector roles, and the leaders running citizen-facing service modernisation. In government, AI must serve the public — and be accountable to it. Citizens are not customers.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Business + technology
leaders

2

Function heads +
transformation owners

3

L&D + internal trainers

4

AI-curious managers

Learning Outcomes

- 1 In government, AI must serve the public and be accountable to it — citizens cannot easily switch suppliers
- 2 5 public-sector plays — service delivery · case work augmentation · fraud detection · intelligent search · translation + accessibility
- 3 3 fail patterns — algorithmic decisions affecting rights without human review, chatbot misrepresentation, opaque high-stakes AI
- 4 Hold the case-worker decision boundary — AI prepares, humans decide on rights
- 5 Apply bias-audit discipline to fraud detection across protected categories before deployment
- 6 Verify AI-cited sources before acting (Mata cross-domain) and enforce access controls in AI search
- 7 Maintain a public AI inventory with impact assessments and named accountable officials — OMB M-24-10 + EU AI Act + UK ATRS
- 8 18-month roadmap with 4 trust trip-wires that protect due process and citizen trust

8-Chapter Curriculum
