- 2 5 public-sector plays — service delivery · case work augmentation · fraud detection · intelligent search · translation + accessibility
- 3 3 fail patterns — algorithmic decisions affecting rights without human review, chatbot misrepresentation, opaque high-stakes AI
- 4 Hold the case-worker decision boundary — AI prepares, humans decide on rights
- 5 Apply bias-audit discipline to fraud detection across protected categories before deployment
- 6 Verify AI-cited sources before acting (Mata cross-domain) and enforce access controls in AI search
- 7 Maintain a public AI inventory with impact assessments and named accountable officials — OMB M-24-10 + EU AI Act + UK ATRS
- 8 18-month roadmap with 4 trust trip-wires that protect due process and citizen trust
