

# Gennoor Tech

TRAIN. INNOVATE. BUILD.

GENNOOR ACADEMY · SELF-PACED ·  
36 MIN

## AI Product Management

A ~36-minute playbook for AI PMs, heads of product, engineering leaders. 5 capabilities (JTBD · eval harnesses · telemetry · guardrails · honest communication). 3 anti-patterns. 12-month roadmap.

|                      |                                                                                                                                                                                        |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>DURATION</b>      | 36 min · 8 modules · self-paced                                                                                                                                                        |
| <b>FORMAT</b>        | Audio-narrated slide chapters with synchronized progress tracking. Interactive end-of-course Markdown builder you take to the next meeting. Free verifiable certificate on completion. |
| <b>AUDIENCE</b>      | Product managers shipping AI features, product directors leading PM teams, founder/PMs at AI startups.                                                                                 |
| <b>PREREQUISITES</b> | Comfort with technology and product workflows. No coding experience required to follow the material; helpful for the hands-on takeaway.                                                |

## Course Outcomes

- 1 AI products are evaluated like products — not like models. Users care about their job, not your benchmarks
- 2 5 capabilities for AI PMs — JTBD framing · eval harnesses · telemetry · guardrails · honest communication
- 3 3 anti-patterns to avoid — chasing benchmarks, shipping without eval + telemetry, adding AI to features that worked fine without it
- 4 Frame each AI feature with the 3-part frame — user job · success criterion · failure modes — in 3 sentences
- 5 Build eval harnesses across 3 categories — task-specific, quality + safety, production telemetry — refreshed monthly
- 6 Use the acceptance rate metric as your primary AI product signal, with privacy-reviewed telemetry
- 7 Refusal as feature — narrow products that do their job well beat broad products that do many jobs poorly
- 8 Model unit economics before launch (inference is not free) and adopt an honest communication posture (Air Canada cross-domain)

# Table of Content

8 modules · 36 min of audio-narrated learning · each module ends with a Monday-move you can apply that week.

## MODULE 01

### The AI PM landscape

~5 MIN · NARRATED + INTERACTIVE

- Products not models
- 5 capabilities (JTBD
- eval
- telemetry
- guardrails
- communication)

---

## MODULE 02

### Job-to-be-done framing

~5 MIN · NARRATED + INTERACTIVE

- 3-part frame (user job
- success criterion
- failure modes)
- the "is this an AI job?" question.

---

## MODULE 03

### Eval harnesses

~5 MIN · NARRATED + INTERACTIVE

- What an eval harness is
- 3 categories (task
- quality+safety
- production telemetry)
- 4 case types.

---

## MODULE 04

### Telemetry + customer feedback

~5 MIN · NARRATED + INTERACTIVE

- 4 telemetry signals
  - The acceptance rate metric
  - Privacy frame on telemetry
  - Honest scoring · 2 questions
-

**MODULE 05****Guardrails + refusals**

~5 MIN · NARRATED + INTERACTIVE

- 4 guardrail categories
- Refusal as feature
- Adversarial testing
- Honest scoring · 2 questions

**MODULE 06****Pricing, communication, trust**

~5 MIN · NARRATED + INTERACTIVE

- 3 pricing approaches
- The unit economics problem
- Honest communication
- Honest scoring · 2 questions

**MODULE 07****Team + operating model**

~5 MIN · NARRATED + INTERACTIVE

- 5 core roles
- operating cadence (weekly
- monthly
- quarterly)
- customer feedback loop.

**MODULE 08****Making it stick: your AI PM roadmap**

~6 MIN · NARRATED + INTERACTIVE · CAPSTONE BUILDER

- 12-month rollout (foundations
- discipline
- cadence)
- 4 trust trip-wires
- interactive Markdown builder for your head of product or CPO.

## Taking This Further

The course is the starting point. The same content powers three concrete next steps you can engage Gennoor Tech to deliver inside your organisation:

### 4-week Pilot

- Fixed scope · fixed price · production artifact
- A working AI capability tied to the content of this course — set up on your data and tooling
- Suitable for: a single function or business unit ready to prove value

### Org-wide Rollout

- 90-day adoption programme · executive + frontline tracks
- Champions network, prompt libraries, governance pack, weekly office hours
- Suitable for: 200-5,000-seat rollouts of Copilot, ChatGPT Enterprise, or similar

### Continuous Build

- Quarterly retainer · embedded engineering + delivery + governance
- Multiple parallel AI initiatives sustained against an evolving roadmap
- Suitable for: large enterprises with portfolio-scale AI ambitions

## Get in touch

Tell us about your AI ambitions, your team, and the constraints you are working under. We respond within one business day across India, GCC, SEA, US, and EU time zones.
