Course Outcomes

- 1 Make AI a portfolio you manage — not pilots you accumulate
- 2 Build healthy pyramid shape — 10-15 pilots · 3-5 scaled · 1-2 embedded (most enterprises have inverted funnels)
- 3 Run stage-gate discipline with explicit kill criteria — 60-80% pilot-to-scale kill rate is healthy
- 4 4 vendor contract pillars — training data rights · update transparency · sunset · liability allocation
- 5 Manage model lifecycle with 4 retraining triggers + a single source-of-truth registry
- 6 Run the ops handoff with 4 artifacts (runbook · model card · dashboard · escalation tree) and a shadow period
- 7 5 PMO roles + honest sizing — underfunding the PMO is the single most common false economy
- 8 90-day bootstrap roadmap with 4 trust trip-wires and an interactive Markdown builder for your CIO
