Course Outcomes

- 1 Apply Tetlock calibration to AI readiness — honest scoring beats green dashboards every time
- 2 Score 5 readiness dimensions independently — data · talent · governance · infrastructure · leadership commitment
- 3 Diagnose 3 stall patterns — pilot-permanent-pilot, data-not-there, governance-afterthought
- 4 Administer the 12-question diagnostic with 3 honest scoring rules — specifically not aspirationally, evidence-anchored, amber/red is normal
- 5 Read your 3-band result — operationalising · building · foundations — and know the next-move for each
- 6 4 trust trip-wires that protect against confidence theatre — no green without evidence, no sponsorship without budget, no permanent pilots, no governance afterthought
- 7 Walk out with a 12-month roadmap and the conversation to take to your CEO with your honest score in hand
- 8 Grounded in NIST AI RMF 1.0, EU AI Act 2024/1689, ISO/IEC 42001:2023, and Andy Grove's leverage framing
