Microsoft 365 Copilot Adoption

A ~36-minute playbook for CIOs, IT leaders, and change managers — adoption is the challenge, not licensing. Active-user fraction is the metric. The 3-phase pilot/scale/embed pattern with 4 trust trip-wires.

Course Brief

DURATION	36 min · 8 modules · self-paced
FORMAT	Audio-narrated slide chapters with synchronized progress tracking. Interactive end-of-course Markdown builder you take to the next meeting. Free verifiable certificate on completion.
AUDIENCE	CIOs, IT leaders, change managers, workplace technology heads, adoption + enablement leads.
PREREQUISITES	No technical prerequisites. The material is written for business decision-makers and assumes only general business literacy.

Course Outcomes

- 1 A real read of M365 Copilot — what ships at \$30/user/month, where it delivers, and the 30-40% active-user gap problem
- 2 The 5 anchor use cases — Word · Excel · PowerPoint · Outlook · Teams — and where the boundary is
- 3 The 3 licensing patterns and the worked business case — active-user fraction is the critical variable
- 4 The IT-admin foundation — tenant isolation, Microsoft Graph, Purview DLP, Defender for Cloud Apps
- 5 The compliance posture — EU AI Act + HIPAA BAA + DPDPA + UK FCA Consumer Duty in writing
- 6 The 3 change-management moves that close the active-user gap — champions, office hours, visible tracking
- 7 When to extend with Copilot Studio (and when not to) — the 3 categories that justify it
- 8 A 3-phase rollout plan (pilot · scale · embed) with 4 trust trip-wires and an interactive Markdown builder

Table of Content

8 modules · 36 min of audio-narrated learning · each module ends with a Monday-move you can apply that week.

MODULE 01

The M365 Copilot landscape

~5 MIN · NARRATED + INTERACTIVE

- \$30/user/month enterprise tier
 - Microsoft's ~30% time savings claim from Work Trend Index
 - the active-user gap (30–40% become active, 60–70% drift back)
 - the thesis that adoption is the challenge, not licensing.
-

MODULE 02

Where Copilot delivers value

~5 MIN · NARRATED + INTERACTIVE

- The 5 anchor use cases — Word drafting
 - Excel analysis
 - PowerPoint outlines
 - Outlook drafting
 - Teams meeting summaries. The boundary: routine knowledge work, not judgement, not identity-specific facts. Mata + Air Canada cross-domain applies.
-

MODULE 03

The licensing + procurement decision

~5 MIN · NARRATED + INTERACTIVE

- \$30/user/month at scale = \$1.8M/yr for 5K users. Three licensing patterns (universal
 - manager-tier
 - opt-in pilot first)
 - worked business case
 - active-user fraction is the critical variable
 - stage-gate pilot pattern from manager course.
-

MODULE 04

Security + compliance posture

~5 MIN · NARRATED + INTERACTIVE

- Tenant isolation
 - Microsoft Graph permission inheritance (Copilot inherits existing permissions — wrong + right)
 - Purview DLP + sensitivity labels
 - Defender for Cloud Apps CASB
 - EU AI Act + HIPAA BAA + DPDPA + UK FCA Consumer Duty.
-

MODULE 05**Adoption + change management**

~5 MIN · NARRATED + INTERACTIVE

- The most important chapter — why 60–70% don't become active (workflow integration
- trust calibration
- accountability)
- the 3 moves (champions network
- weekly office hours
- visible tracking via Adoption Score + Viva Insights)

MODULE 06**Copilot Studio + agentic extensions**

~5 MIN · NARRATED + INTERACTIVE

- Microsoft Copilot Studio for custom agents
- 3 categories to extend (internal knowledge AI
- workflow automation
- domain-specific assistants)
- 3 patterns NOT to extend
- 3-phase build pattern

MODULE 07**Measuring real outcomes**

~5 MIN · NARRATED + INTERACTIVE

- Tetlock calibration on Microsoft's 30%
- the active-user metric (1+ Copilot interaction per week)
- the early-decay pattern (40-50% month 1 !' 20-30% month 3)
- honest 3-number framework
- don't extrapolate to full licensed base.

MODULE 08**Making it stick: your Copilot rollout roadmap**

~6 MIN · NARRATED + INTERACTIVE · CAPSTONE BUILDER

- 3-phase rollout (pilot weeks 1-12
- scale months 4-6
- embed months 7+)
- 4 trust trip-wires
- interactive builder that downloads a Markdown roadmap for your CIO conversation.

Taking This Further

The course is the starting point. The same content powers three concrete next steps you can engage Gennoor Tech to deliver inside your organisation:

4-week Pilot

- Fixed scope · fixed price · production artifact
- A working AI capability tied to the content of this course — set up on your data and tooling
- Suitable for: a single function or business unit ready to prove value

Org-wide Rollout

- 90-day adoption programme · executive + frontline tracks
- Champions network, prompt libraries, governance pack, weekly office hours
- Suitable for: 200-5,000-seat rollouts of Copilot, ChatGPT Enterprise, or similar

Continuous Build

- Quarterly retainer · embedded engineering + delivery + governance
- Multiple parallel AI initiatives sustained against an evolving roadmap
- Suitable for: large enterprises with portfolio-scale AI ambitions

Get in touch

Tell us about your AI ambitions, your team, and the constraints you are working under. We respond within one business day across India, GCC, SEA, US, and EU time zones.
