Course Overview

For retail CEOs, CDOs, eCommerce GMs, and the heads of merchandising, pricing, and customer experience. AI scales fast in retail but breaks brand fast. The data is plentiful, the use cases are obvious, the temptation to over-personalise and over-automate is real — and brand integrity, customer trust, and fair pricing are the lines that don't move.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion
