- 2 5 plays — discovery · trial operations · regulatory submission · pharmacovigilance + RWE · commercial + medical affairs
- 3 Honestly read the AI discovery disappointment pattern — AI accelerates early stages, not guarantees clinical success
- 4 Keep investigator + medical monitor accountable under GCP — AI assists, humans decide
- 5 Apply citation discipline to AI-drafted regulatory content — every citation verified (Mata cross-domain), Part 11 audit trail
- 6 Preserve medical review on PV — qualified safety physician's causality assessment cannot be replaced by AI
- 7 Run AI promotional content through MLR — off-label suggestions and unsourced claims are enforcement targets
- 8 Validate AI in GxP contexts — 4 validation components and audit-ready documentation before deployment
