AI Product Management

A ~36-minute playbook for AI PMs, heads of product, engineering leaders. 5 capabilities (JTBD · eval harnesses · telemetry · guardrails · honest communication). 3 anti-patterns. 12-month roadmap.

Course Overview

For product managers, heads of product, and engineering leaders building AI features into products customers actually use. AI products are evaluated like products — not like models. Users do not care about model accuracy in the abstract; they care whether the product works for their job in their context.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Business + technology
leaders

2

Function heads +
transformation owners

3

L&D + internal trainers

4

AI-curious managers

Learning Outcomes

- 1 AI products are evaluated like products — not like models. Users care about their job, not your benchmarks
- 2 5 capabilities for AI PMs — JTBD framing · eval harnesses · telemetry · guardrails · honest communication
- 3 3 anti-patterns to avoid — chasing benchmarks, shipping without eval + telemetry, adding AI to features that worked fine without it
- 4 Frame each AI feature with the 3-part frame — user job · success criterion · failure modes — in 3 sentences
- 5 Build eval harnesses across 3 categories — task-specific, quality + safety, production telemetry — refreshed monthly
- 6 Use the acceptance rate metric as your primary AI product signal, with privacy-reviewed telemetry
- 7 Refusal as feature — narrow products that do their job well beat broad products that do many jobs poorly
- 8 Model unit economics before launch (inference is not free) and adopt an honest communication posture (Air Canada cross-domain)

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The AI PM landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- Products not models
- 5 capabilities (JTBD
- eval
- telemetry
- guardrails
- communication)

02

Job-to-be-done framing

CHAPTER 2 · 5 MIN · NARRATED + INTERACTIVE

- 3-part frame (user job
- success criterion
- failure modes)
- the "is this an AI job?" question.

03

Eval harnesses

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- What an eval harness is
- 3 categories (task
- quality+safety
- production telemetry)
- 4 case types.

04

Telemetry + customer feedback

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- 4 telemetry signals
- the acceptance rate metric
- privacy frame on telemetry.

05

Guardrails + refusals

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- 4 guardrail categories
- refusal as feature
- adversarial testing required.

06

Pricing, communication, trust

CHAPTER 6 · 5 MIN · NARRATED + INTERACTIVE

- 3 pricing approaches
- the unit economics problem
- honest communication (Air Canada cross-domain).

07

Team + operating model

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- 5 core roles
- operating cadence (weekly
- monthly
- quarterly)
- customer feedback loop.

08

Making it stick: your AI PM roadmap

CHAPTER 8 · 6 MIN · NARRATED + INTERACTIVE

- 12-month rollout (foundations
- discipline
- cadence)
- 4 trust trip-wires
- interactive Markdown builder for your head of product or CPO.
