Enterprise Data Foundations for AI

A ~36-minute foundations course for CDOs, data platform leaders, architects — most AI projects fail at the data step. 5 pillars, data product pattern, data contracts, vendor reality, 18-month roadmap.

Course Overview

For chief data officers, data platform leaders, and architects making the platform decisions today that will define AI capability for the next five years. The honest version: most AI projects fail at the data step — not the model step. Five pillars of data foundations — quality, lineage, governance, privacy, platform pattern.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Anyone starting their AI journey

2

Non-technical professionals

3

Managers + analysts

4

L&D teams

Learning Outcomes

- 1** Most AI projects fail at the data step — recognise the pattern and stop it
- 2** 5 pillars of data foundations — quality · lineage · governance · privacy · platform — scored independently
- 3** 3 anti-patterns that waste budgets — buy platform without fixing data, ocean-boil cleanup projects, disconnected data team
- 4** Apply the DAMA-DMBOK quality framework with 4 dimensions (accuracy · completeness · freshness · consistency)
- 5** Build defensible lineage — EU AI Act Art 15 + NIST AI RMF + GDPR Art 30 traceability
- 6** Choose the right architecture — lakehouse + federated-with-central-platform is durable for most enterprises
- 7** Adopt the data product pattern — 3-5x AI team speed when data is published as curated, versioned, owned products
- 8** 18-month rollout with 4 trust trip-wires you don't cross, plus an interactive builder for your CDO/CIO conversation

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The data foundations landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- Most AI projects fail at the data step
- 5 pillars
- 3 anti-patterns (buy-platform
- ocean-boil
- disconnected team)
- what this course covers.

02

Data quality

CHAPTER 2 · 5 MIN · NARRATED + INTERACTIVE

- DAMA framework
- 4 dimensions (accuracy
- completeness
- freshness
- consistency)
- 3 failure modes (entity-gap

03

Data lineage

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- 3 reasons (explainability
- regulation
- incident response)
- 3 layers (source-to-sink
- transformation
- semantic)

04

Data governance

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- 4 components (ownership
- access
- retention
- deletion)
- multi-jurisdiction (GDPR + DPDPA + CCPA + PIPL)
- 3 failure modes.

05

Data privacy techniques

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- 3 techniques (masking
- tokenisation
- differential privacy)
- matched to 4 scenarios
- 3 failure modes.

06

The platform pattern

CHAPTER 6 · 5 MIN · NARRATED + INTERACTIVE

- 2 architecture choices (lakehouse
- federated-with-central)
- data product pattern (3-5x AI team speed)
- data contracts as reliability layer.

07

Vendor + tooling reality

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- 2026 landscape (Databricks
- Snowflake
- Fabric
- Collibra
- Atlan
- Monte Carlo)

08

Making it stick: your data foundations roadmap

CHAPTER 8 · 6 MIN · NARRATED + INTERACTIVE

- 3-phase 18-month rollout
- 4 trust trip-wires
- interactive Markdown builder.
