- 2 Analyse business requirements and translate them into agentic AI solution designs — the architect's decision framework
- 3 Develop AI strategy with executive sponsors — capability mapping, capacity planning, capital allocation
- 4 Design solutions with the right pattern — topic vs generative, plugin vs agent, when to extend vs orchestrate
- 5 Orchestrate prebuilt agents (Sales, Service, Finance) and custom agents in one coherent business workflow
- 6 Manage governance at scale — environment strategy, ALM pipelines, monitoring signals, quality gates
- 7 Sit a 50-question mock exam that mirrors the real AB-100 format and difficulty
