Course Outcomes

- 1 AI talent is the bottleneck — not the technology. The economics are asymmetric
- 2 Match capability to source — build / buy / borrow framework with 3 signals each
- 3 5 core roles + 3 emerging — ML engineer · data scientist · MLOps · AI PM · AI lead, plus governance/prompt/ethicist
- 4 Hire in a tight market — convert internal engineers, hire at senior-not-principal, source from adjacent fields
- 5 Retain through interesting work + access + path + competitive comp — in that order
- 6 The AI fluency build is the leverage — 5-10x payback vs hiring 1 senior engineer
- 7 Pick the right org model — hub-and-spoke beats pure central or pure federated for 500+ organisations
- 8 12-month talent roadmap with 4 trust trip-wires and an interactive builder for your CHRO or CEO
