30 MIN

Building AI Agents with Copilot Studio

A ~30-minute production-readiness course for Power Platform builders. 6 components, 4-question topic framework, 12-item production gate. Voice: Andrew.

Course Brief

DURATION	30 min · 8 modules · self-paced
FORMAT	Audio-narrated slide chapters with synchronized progress tracking. Interactive end-of-course Markdown builder you take to the next meeting. Free verifiable certificate on completion.
AUDIENCE	Power Platform builders, AI developers, solution architects, L&D + internal trainers.
PREREQUISITES	Comfort with technology and product workflows. No coding experience required to follow the material; helpful for the hands-on takeaway.

Course Outcomes

- 1 The 6 components of the Copilot Studio stack — and the 3 architectural decisions made deliberately at the start
- 2 The 4-question framework for topic vs generative answers — avoid the topic-explosion anti-pattern most teams hit by topic 20
- 3 Plugins + connectors at production scale — the 4-component auth model and 3 production failure modes
- 4 Agents + agent flows with state isolation tested under concurrent load — not just in single-user demos
- 5 Knowledge sources at scale — SharePoint, files, web, MCP, Dataverse with row-level security
- 6 Deployment through 3 environments with managed solutions and pipelines that scale across the estate
- 7 Governance with 3 layers — tenant, environment, per-agent — plus the 5 monitoring signals you watch
- 8 The 12-item production-readiness checklist and 4 week-one conversations to schedule with stakeholders

Table of Content

8 modules · 30 min of audio-narrated learning · each module ends with a Monday-move you can apply that week.

MODULE 01

Copilot Studio architecture

~4 MIN · NARRATED + INTERACTIVE

- 6 components
- 3 architectural decisions (environment
- auth
- knowledge sources)
- governance from day one.

MODULE 02

Topic design vs generative answers

~4 MIN · NARRATED + INTERACTIVE

- 4-question framework
- Topic explosion · anti-pattern
- The hybrid pattern
- Honest scoring · 2 questions

MODULE 03

Plugins and connectors at production scale

~4 MIN · NARRATED + INTERACTIVE

- 3 connector patterns
- 4-component auth model
- 3 production failure modes (errors
- rate limits
- latency).

MODULE 04

Agents and agent flows

~4 MIN · NARRATED + INTERACTIVE

- 3 differences (state
- reasoning
- tool composition)
- 3 orchestration patterns
- state isolation under concurrent load.

MODULE 05**Knowledge sources, MCP, and Dataverse**

~4 MIN · NARRATED + INTERACTIVE

- 3 source types
- MCP scope-down + observability + versioning
- Dataverse 4-check (RLS
- roles
- field-level
- cross-role test).

MODULE 06**Deployment, ALM, and environments**

~4 MIN · NARRATED + INTERACTIVE

- 3-environment path
- 3 solution rules
- 3 pipeline patterns
- Honest scoring · 2 questions

MODULE 07**Governance and monitoring at scale**

~4 MIN · NARRATED + INTERACTIVE

- 3 governance layers
- 5 monitoring signals
- 3 estate-management rhythms (weekly
- quarterly
- annual).

MODULE 08**Production-grade Copilot Studio agent**

~4 MIN · NARRATED + INTERACTIVE · CAPSTONE BUILDER

- 3-section design doc
- 12-item production gate (4 architecture
- 4 security
- 4 operations)
- interactive builder.

Taking This Further

The course is the starting point. The same content powers three concrete next steps you can engage Gennoor Tech to deliver inside your organisation:

4-week Pilot

- Fixed scope · fixed price · production artifact
- A working AI capability tied to the content of this course — set up on your data and tooling
- Suitable for: a single function or business unit ready to prove value

Org-wide Rollout

- 90-day adoption programme · executive + frontline tracks
- Champions network, prompt libraries, governance pack, weekly office hours
- Suitable for: 200-5,000-seat rollouts of Copilot, ChatGPT Enterprise, or similar

Continuous Build

- Quarterly retainer · embedded engineering + delivery + governance
- Multiple parallel AI initiatives sustained against an evolving roadmap
- Suitable for: large enterprises with portfolio-scale AI ambitions

Get in touch

Tell us about your AI ambitions, your team, and the constraints you are working under. We respond within one business day across India, GCC, SEA, US, and EU time zones.
