AI for Customer Service & Support

A 65-minute playbook for CX leaders — three CS-AI patterns that ship, two that backfire, the disciplined agent-assist stack, scoped deflection bots, and a 4-week pilot plan with the KPIs that prove value.

Course Overview

No vendor-pitch hype. Three CS-AI patterns that consistently ship value — agent assist, scoped tier-1 deflection bots, grounded knowledge AI — and two that consistently backfire, named explicitly so the budget redirects. The four-component agent-assist stack with the three anti-patterns the team will quietly route around.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

CX leaders

2

Customer service VPs

3

Support Operations
heads

4

Contact centre
leadership

Learning Outcomes

- 1 The 3 CS-AI patterns that ship in production — agent-assist, scoped deflection bots, hybrid
- 2 The 2 patterns that backfire — full bot deflection without escalation, AI-only triage
- 3 The disciplined agent-assist stack that drops AHT without breaking quality
- 4 The scoped-deflection-bot design — narrow scope, clear escalation, fast handoff
- 5 A 4-week pilot plan with the KPIs that actually prove value (CSAT, FCR, deflection, AHT)
- 6 The Air Canada Moffatt boundary — anything the AI says is a representation by your company
- 7 The disclosure + escalation discipline — EU AI Act Article 50, when to reveal AI, when to hand to human
- 8 The quality-monitoring loop — shadow QA, drift detection, the 5 metrics that matter weekly

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The CS-AI fit map

CHAPTER 1 · 8 MIN · NARRATED + INTERACTIVE

- Three patterns that ship — agent assist, scoped deflection bots, grounded knowledge AI
- two that backfire — unscoped bots, autonomous escalation
- the principle for every vendor pitch.

02

Agent assist done right

CHAPTER 2 · 9 MIN · NARRATED + INTERACTIVE

- The four-component stack (suggested response
- knowledge surfacing
- real-time coaching
- auto case summary)
- three anti-patterns
- the six-week rollout rhythm.

03

Scoped tier-1 deflection bots

CHAPTER 3 · 9 MIN · NARRATED + INTERACTIVE

- The intent inventory test (top 10 = 60%+ of volume?)
- three scope rules (whitelist
- turn cap
- emotional escalation exit)
- the three-component clean-handoff design.

04

Multilingual support at scale

CHAPTER 4 · 9 MIN · NARRATED + INTERACTIVE

- Measure language reality + tier languages explicitly
- code-switching as the production reality (continuous per-turn detection + preserved vocab + register match)
- three production gotchas.

05

Knowledge base AI — without hallucinated policies

CHAPTER 5 · 9 MIN · NARRATED + INTERACTIVE

- Three grounding disciplines (retrieval-only
- mandatory citations
- refusal patterns)
- KB-quality gate (atomic articles + same-day versioning + quarterly audit)
- three citation patterns.

06

Sentiment, escalation, and frontline trust

CHAPTER 6 · 9 MIN · NARRATED + INTERACTIVE

- Three support-not-surveillance principles
- three escalation logic components (tiered severity
- agent-requested wins
- supervisor capacity gate)
- three team-trust signals to send right.

07

Voice support AI

CHAPTER 7 · 8 MIN · NARRATED + INTERACTIVE

- Three voice plays (IVR replacement
- structured data capture
- wait-time assistant)
- three production gotchas (latency
- accent
- interruption handling)

08

Capstone — Your 4-week CS AI pilot plan

CHAPTER 8 · 7 MIN · NARRATED + INTERACTIVE

- One play, four weeks deeply (agent assist as default)
- KPI scaffold (4 numbers, 2 cadences)
- four conversations to schedule Monday.
