AI Governance, Risk & Boards

A ~40-minute brief for board directors, audit committee members, risk officers, CISOs, GCs. Risk classification, register, NIST 4 functions controls, vendor posture, board questions, incident response, governance charter. Grounded in EU AI Act, NIST AI RMF, ISO 42001.

Course Overview

For board directors, audit committee members, risk officers, CISOs, GCs past basic AI literacy. Eight chapters across the AI governance surface: the 2026 landscape (EU AI Act Reg. 2024/1689 in tranches through Aug 2 2026, NIST AI RMF as de facto US standard, ISO 42001 audit-able certification, US EO Biden!'Trump!'AI Action Plan, OECD principles across 47+ countries); AI risk classification (EU 4-tier framing + NIST context-based, 5-category taxonomy: bias, hallucination, security, IP, operational); the AI risk register (5-column structure, quarterly cadence, 3 escalation triggers, Deloitte ACP Q4 2025: 62% want disclosure, 31% want sample-testing); NIST AI RMF 4 functions (Govern, Map — Mata failure mode, Measure — Air Canada failure mode, Manage); vendor + supply-chain risk (3 enterprise terms settings, Anthropic RSP + OpenAI Preparedness, third-party concentration, open-source trade-offs); the 7 board-level questions every director must answer in 1 minute (cross-domain Charlotin tracker of 100+ AI-fabricated court filings as governance signal); incident response (5 categories, 4-24-72 timeline, EU AI Act Art. 27 FRIA, WEF Global Risks 2025 misinformation as #1 short-term risk); and the close — 1-page AI governance charter with interactive builder, 4 trust trip-wires, through-line: audit-defensible posture, calibration over confidence, concrete obligations.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

Learning Outcomes

- 1** A working knowledge of the AI governance regulatory stack — EU AI Act, NIST AI RMF, ISO 42001 + sector overlays
- 2** The risk classification framework you can defend to regulators, auditors, and litigation
- 3** A risk register pattern that's real, not a checkbox — with the NIST 4 functions controls embedded
- 4** The vendor posture — what to demand in writing from every AI vendor before signing
- 5** 4 board resolutions every regulated company should pass — wording sourced from real precedent
- 6** The 10 board questions for every AI initiative — the diligence script directors can use today
- 7** Incident response for AI — the playbook for the day something goes wrong publicly
- 8** A governance charter template — the document that makes oversight real

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The 2026 governance landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- EU AI Act Reg. 2024/1689 in tranches through Aug 2 2026 (Annex III, Art. 26, Art. 50, Art. 99 fines).
- NIST AI RMF as de facto US standard.
- ISO 42001 audit-able certification.
- US EO landscape Biden!'Trump!'AI Action Plan.
- State patchwork.
- India DPDPA.

02

AI risk classification

CHAPTER 2 · 5 MIN · NARRATED + INTERACTIVE

- EU AI Act 4-tier framing (prohibited, high-risk Annex III, limited, minimal).
- NIST context-based approach. 5-category taxonomy: bias + fairness (Bloomberg resume study), hallucination + accuracy (Stanford 17–34%), security + privacy, IP, operational + concentration.

03

The AI risk register

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- 5-column structure (system + purpose, tier, owner, status, last review).
- Quarterly council + annual audit-committee cadence + material-change ad-hoc.
- Deloitte ACP Q4 2025: 62% want disclosure, 31% want sample-testing. 3 escalation triggers (material finding, new high-risk, regulatory change).

04

Controls · NIST AI RMF 4 functions

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- Govern (policies, accountability, risk culture).
- Map (Mata v.
- Avianca failure mode — knowing what you're deploying).
- Measure (Air Canada Moffatt failure mode — what the chatbot tells customers).
- Manage (mitigate, document, communicate).
- All 4 required.

05

Vendor and supply-chain risk

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- Enterprise terms baseline (training opt-out, tenant isolation, retention) in writing across OpenAI/Anthropic/MS/Google.
- Anthropic RSP + OpenAI Preparedness Framework as vendor safety landscape.
- Third-party concentration risk.
- Open-source trade-offs (Llama, Mistral, Falcon).

06

Board-level AI questions

CHAPTER 6 · 4 MIN · NARRATED + INTERACTIVE

- 7 questions every director must answer in 1 minute: inventory + high-risk; named ownership; failure scenarios + response; EU/NIST/state posture; vendor concentration; incident protocol; disclosure.
- Cross-domain Mata + Park + Charlottin tracker (100+ AI-fabricated court filings mid-2025) as governance signal.

07

Incident response and disclosure

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- 5 incident categories (material output failure, security, vendor outage, regulatory action, peer signal). 4-24-72 hour escalation timeline.
- EU AI Act Art. 27 FRIA re-assessment on material finding.
- WEF Global Risks 2025: AI-driven misinformation = #1 short-term risk for 2 years running.

08

Making it stick: your AI governance charter

CHAPTER 8 · 4 MIN · NARRATED + INTERACTIVE

- 4 pieces
- 1 page: framework spine (EU + NIST + ISO 42001)
- classification posture
- AI council
- disclosure baseline. 4 trust trip-wires: no untested model in regulated decisions, no vendor without enterprise terms, no unverified AI in material disclosure, no "set and forget". Interactive charter builder.
