40 MIN

AI in Healthcare

A ~40-minute brief for hospital execs, clinical leaders, CMIOs, healthcare CIOs, payer leaders. Ambient scribing, clinical decision support, radiology, patient-facing AI, payer AI, 4-quadrant regulatory posture. Grounded in FDA SaMD, EU MDR, HIPAA, India DPDPA.

Course Overview

A grounded, citation-rigorous brief for hospital execs, clinical leaders, CMIOs, healthcare CIOs, and payer leaders past basic AI literacy. Eight chapters across the full healthcare AI surface — ambient scribing, clinical decision support, diagnostic radiology, patient-facing AI, payer AI, and the 4-quadrant regulatory posture you need to defend in writing. The through-line: patient safety, physician responsibility, and a regulator-aware posture in every decision.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

Hospital executives ·
CMOs

2

CMIOs · healthcare CIOs

3

Clinical leaders

4

Payer leaders

Learning Outcomes

- 1 Read the healthcare AI landscape honestly — FDA's 1000+ AI-enabled device list (~80% radiology) and where each use case actually sits today
- 2 Stand up ambient scribing the right way — HIPAA BAA, in-tenant processing, 3-sentence patient consent script, EU AI Act Art. 50 + DPDPA
- 3 Hold the clinical-decision-support line — Epic Cosmos / UpToDate / Tempus as augmentation, ABIM + AMA + CMS responsibility on the clinician
- 4 Deploy diagnostic AI with discipline — Aidoc / Annalise / Heuron, FDA SaMD pathway, radiologist-in-the-loop, 3 deployment patterns
- 5 Handle patient-facing AI safely — Air Canada Moffatt cross-domain, EU Art. 50 + HIPAA + India DPDPA, real consent + honoured opt-out
- 6 Draw the payer-AI line that survives — ProPublica + CMS scrutiny, approvals AI-augmented, denials require clinician-in-the-loop
- 7 Defend a 5-section compliance + ethics document with FDA / HIPAA / EU AI Act / NIST AI RMF / ABIM, AMA, CMS
- 8 Walk out with a 2-quarter hospital AI roadmap and 4 trust trip-wires (physician responsibility · patient consent · no AI-only denials · no set-and-forget)

8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

The healthcare AI landscape

CHAPTER 1 · 5 MIN · NARRATED + INTERACTIVE

- FDA AI-enabled devices list: 1000+ by mid-2025 (~80% radiology).
- Microsoft+Nuanca DAX ambient scribing widely deployed.
- Epic Cosmos/AI.
- Tempus/Flatiron oncology.
- Aidoc/Annalise/Heuron radiology.
- ABIM/AMA/CMS unambiguous: clinical decisions = physician responsibility. 3 failure modes (hallucination, bias, Air Canada).

02

Ambient scribing

CHAPTER 2 · 4 MIN · NARRATED + INTERACTIVE

- Microsoft Nuanca DAX, Abridge, Suki, Augmedix, DeepScribe — fastest-deploying healthcare AI use case. 2+ hours/day physician documentation saved.
- HIPAA BAA required.
- In-tenant/in-VPC processing. 3-sentence patient consent script.
- EU AI Act Art. 50 + India DPDPA.

03

Clinical decision support

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- Epic Cosmos+AI, UpToDate Clinical AI, Tempus/Flatiron oncology, Owkin multi-omics.
- ABIM+AMA+CMS responsibility line unambiguous: physician decides, AI supports.
- Stanford hallucination cross-domain = medical-error vector.
- Retrieval grounding + citations.
- Bias monitoring across demographic subgroups.

04

Radiology + diagnostic AI

CHAPTER 4 · 5 MIN · NARRATED + INTERACTIVE

- Most-deployed FDA-cleared AI (~80% of 1000+ devices).
- Aidoc, Annalise, Heuron, Viz.AI, RapidAI.
- FDA SaMD pathway since 2017.
- Radiologist-in-the-loop required. 3 deployment patterns: workflow triage, second read, pre-screen.
- False-positive/negative trade-offs tracked.

05

Patient-facing AI + consent

CHAPTER 5 · 4 MIN · NARRATED + INTERACTIVE

- Patient chatbots, symptom checkers, discharge instruction AI, post-discharge follow-up bots.
- Air Canada Moffatt cross-domain applies directly — coverage commitments + clinical statements = hospital's statement.
- EU AI Act Art. 50 + HIPAA + India DPDPA. 3-sentence consent script.
- Honour the opt-out.

06

Payer AI + the controversy

CHAPTER 6 · 4 MIN · NARRATED + INTERACTIVE

- Most-contested healthcare AI use case.
- ProPublica + ABC News investigations of large-payer prior-auth denials.
- Class-action settlements through 2024.
- State AG investigations (CA, NY, TX) through 2025.
- Proposed CMS rules through 2025 on prior-auth AI transparency.
- The line: approvals can be AI-augmented, denials need clinician-in-loop.

07

Regulatory and ethical posture

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- 4-quadrant compliance: FDA SaMD + EU MDR/IVDR (clinical AI as medical device)
- HIPAA + India DPDPA + EU GDPR Art. 9/22 (health data protection)
- EU AI Act (Annex III + Art. 26/27/50/99)
- NIST AI RMF + CHAI + ABIM/AMA/CMS (ethics + voluntary). 5-section compliance and ethics document.

08

Making it stick: your hospital AI roadmap

CHAPTER 8 · 4 MIN · NARRATED + INTERACTIVE

- 2 use cases
- 2 quarters
- patient-safety through-line. Q1 = ambient scribing + radiology AI with controls. Q2 = one CDS use case with full physician-in-the-loop. 4 trust trip-wires: physician responsibility, patient consent, no AI-only denials, no "set and forget". Interactive roadmap builder.
