AI Literacy for Non-Technical Teams

A 40-minute foundations course for HR, Marketing, Sales, and Ops — no code, no jargon, just where AI actually helps your day-to-day.

Course Overview

For individual contributors and managers in non-technical functions who are being asked to use AI in their day-to-day. Six chapters: distinguishing rules-based, machine learning, and generative AI in plain English; prompting as a learnable skill (Goal · Context · Source · Expectations); where AI helps you specifically by function; the risks every non-technical user should know — with real named cases (Air Canada, iTutorGroup, Samsung); ten prompts to try this week; and a one-page week-one plan. No capstone.

FORMAT: Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

Who Is This For?

1

HR · Marketing · Sales ·
Ops

2

Non-technical
professionals

3

L&D leaders

4

AI-curious managers

Learning Outcomes

- 1** A working AI vocabulary — terms you can defend in a meeting, no jargon, no fear
- 2** Where AI actually helps day-to-day for HR, Marketing, Sales, and Ops — concrete plays per function
- 3** The 3 risks every non-technical employee should know — hallucinations, bias, data-handling
- 4** The "augment-don't-replace" reflex — when to lean in, when to skip it
- 5** How to draft, review, and refine AI output without losing the judgement that makes you good at your job
- 6** The data-handling discipline — what you can paste into a public AI tool and what you absolutely cannot
- 7** Practical Monday-morning moves that compound into team-level fluency over a quarter

6-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

01

Demystifying AI

CHAPTER 1 · 7 MIN · NARRATED + INTERACTIVE

- Three things sitting in your Gmail right now are three completely different kinds of AI — rules, machine learning, generative.
- Tell them apart, and you stop trusting them all the same.

02

Prompting as a learnable skill

CHAPTER 2 · 8 MIN · NARRATED + INTERACTIVE

- One real prompt refined live in four steps — Goal
- Context
- Source
- Expectations. The same framework that takes a 6-out-of-10 follow-up email to a 9.

03

Where AI actually helps you (by function)

CHAPTER 3 · 9 MIN · NARRATED + INTERACTIVE

- Four function lanes — HR, Marketing, Sales, Ops — with one concrete story under each.
- Then a switcher panel with three highest-leverage prompts per function and the trap that catches people first time.

04

The risks you should know

CHAPTER 4 · 7 MIN · NARRATED + INTERACTIVE

- Three named incidents — Air Canada (2024), iTutorGroup EEOC (2023), Samsung (2023) — with the precedents they set.
- The list of what never goes in a public AI tool, the enterprise carve-out, and a sorter to calibrate your paste instincts.

05

Ten prompts to try this week

CHAPTER 5 · 6 MIN · NARRATED + INTERACTIVE

- A library — ten tested prompts you can copy, with sample inputs, expected outputs, and the one thing that makes each one work.
- Pick three.
- Run them on real material.
- By month three, the library is doing the heavy lift.

06

Making it stick at your desk: week one

CHAPTER 6 · 6 MIN · NARRATED + INTERACTIVE

- The data on why most adoption fails (44.2% quit after one underwhelming output), the week-one trap that catches people on Wednesday, and a customisable five-day plan per function.
- Closes the course with an imperative, not a recap.
