TRAIN. INNOVATE. BUILD.

GENNOOR ACADEMY · SELF-PACED ·  
40 MIN

## Generative AI for Business

A ~40-minute course for mid + senior managers. The 4 skills that separate AI-leveraged leaders: framing use cases, evaluating vendors, running pilots that scale, measuring outcomes. Grounded in Stanford, McKinsey, MIT/BCG/Harvard productivity studies.

## Course Overview

For mid-level and senior managers across functions past basic AI literacy. Eight chapters across the manager AI surface: the 2026 landscape (Stanford 78% / McKinsey 71% adoption, Gartner trough cleanup, Andy Grove leverage framing, WEF 86% transformation); framing use cases (4-question framework: task/cost/data/failure mode, 5 categories that work, 3 that don't); evaluating vendors (Tetlock calibration > confidence, 3 questions for any productivity claim, enterprise terms baseline of training opt-out + tenant isolation + retention); build vs buy (McKinsey + BCG: build only when proprietary data + workflow is the moat, 3 categories — off-the-shelf, configure with vendor, build custom — Gartner <30% deliver value caution); running pilots that scale (stage-gate: pilot/scale/embed, kill discipline, MS Work Trend active-user reality, 3-thing measurement framework); risks managers must know (3 verifiable cases — Mata + Air Canada + Bloomberg, personal-data rule, EU AI Act Art. 50 + Annex III + Art. 99, 3 risk categories: legal/reputational/customer-data); leading the team through change (WEF future of jobs, 3 manager moves — model/expect/measure, Grove leverage applied to people, 3 hard conversations); and the close — 90-day GenAI plan with interactive builder, 4 trust trip-wires, through-line: framing beats using · evaluating beats trusting · piloting beats deploying · measuring beats hoping.

**FORMAT:** Self-paced · 8 chapters · audio-narrated slides · interactive end-of-course builder · free certificate on completion

## Who Is This For?

1

Mid + senior managers

2

Business unit leaders

3

Function heads  
exploring AI

4

L&D + transformation  
teams

## Learning Outcomes

- 1 A grounded view of generative AI — drafting, summarising, transforming — and where it stops being reliable
- 2 The 4 skills that separate AI-leveraged leaders from spectators — framing, evaluating, piloting, measuring
- 3 How to frame use cases that survive contact with reality — the use-case fit map
- 4 How to evaluate vendors — the questions that separate signal from pitch
- 5 How to run pilots that scale — stage-gates, success criteria, the kill-bad-bets discipline
- 6 How to measure outcomes — outcome metrics not AI metrics, the executive narrative that holds up
- 7 A 2-quarter portfolio plan defensible to the board — with the trust trip-wires built in

## 8-Chapter Curriculum

Self-paced, audio-narrated slide format. Each chapter ends with a "Monday move" the learner can apply that week.

**01**

### The 2026 landscape for managers

CHAPTER 1 · 4 MIN · NARRATED + INTERACTIVE

- Stanford AI Index 78% adoption
- McKinsey 71% regular gen AI use
- Gartner trough of disillusionment cleanup. Grove "High Output Management" leverage framing. WEF Future of Jobs 86% transformation. The 4 skills: framing, evaluating, piloting, measuring.

**02**

### Framing use cases

CHAPTER 2 · 5 MIN · NARRATED + INTERACTIVE

- The 4-question framework: task (specific)
- cost today
- data available
- failure mode. 5 categories that work (drafting, summarising, translating, classifying, code). 3 that don't (open research with citations, judgement decisions, identity-specific facts).

**03**

### Evaluating vendors

CHAPTER 3 · 5 MIN · NARRATED + INTERACTIVE

- Tetlock: calibration > confidence. 3 questions: studied population (who exactly), compared to what (honest baseline), what didn't get measured. Enterprise terms baseline in writing: training opt-out + tenant isolation + retention. OpenAI Enterprise
- Anthropic Commercial
- MS Copilot for M365.

**04**

### Build vs buy

CHAPTER 4 · 4 MIN · NARRATED + INTERACTIVE

- McKinsey + BCG advisory: build only when proprietary data + workflow is the moat. 3 categories — off-the-shelf (80% of use cases), configure with vendor (Salesforce/SAP/Workday), build custom.
- Cost shape over 3 years.
- Gartner <30% deliver value caution.

**05**

### Running pilots that scale

CHAPTER 5 · 5 MIN · NARRATED + INTERACTIVE

- Stage-gate methodology: pilot (1 team / 1 quarter) !' scale (10x users) !' embed (3 months default reach).
- Kill discipline. 3-thing measurement framework: baseline before, counterfactual, quality + re-work.
- MS Work Trend Index active-user reality.

06

**Risks managers must know**

CHAPTER 6 · 5 MIN · NARRATED + INTERACTIVE

- 3 verifiable cases — Mata v. Avianca (S.D.N.Y. Jun 2023, \$5K + letters to judges), Moffatt v. Air Canada (BC CRT Feb 2024, CA\$812), Bloomberg resume study (Mar 2024). Personal-data rule. EU AI Act Art. 50 + Annex III + Art. 99. 3 risk categories: legal
- reputational
- customer-data.

07

**Leading the team through change**

CHAPTER 7 · 5 MIN · NARRATED + INTERACTIVE

- WEF Future of Jobs context (86% transformation, 40% reduction). 3 manager moves: model the behaviour, set the expectation, measure the outcome.
- Grove leverage applied to people. 3 conversations: the team, the boss, the AI-resistant individual.

08

**Making it stick: your 90-day GenAI plan**

CHAPTER 8 · 4 MIN · NARRATED + INTERACTIVE

- 2 use cases
- 90 days
- 1 measurement framework. Month 1 = frame + pilot (4-question framework, week-3 pilot). Month 2 = measure + adjust. Month 3 = scale or kill. 4 trust trip-wires: no untested AI in customer-facing/regulated, no sensitive data to free tools, no AI signs commitments, no "set and forget".
