HANDS-ON LABS

7

AI PROJECTS

Course Overview

This 5-day hands-on bootcamp covers the entire Microsoft AI ecosystem — from Azure AI Foundry (the new unified platform) and Azure OpenAI through Copilot Studio, AI Search, Document Intelligence, and Power Platform AI. Developers build 7 production-ready AI solutions using Microsoft's integrated stack, learning to leverage the platform's unique advantages for enterprise deployment, security, and governance.

The deepest Microsoft AI bootcamp available. This isn't a survey course — it's a hands-on engineering program that covers every major Microsoft AI service in depth. You'll build with Azure AI Foundry and Azure OpenAI, deploy agents via Copilot Studio, implement RAG with AI Search, process documents with Document Intelligence, and automate workflows with Power Platform AI — all integrated into cohesive enterprise solutions. Delivered by a Microsoft Certified Trainer with 16+ active Microsoft certifications.

Who Is This For?

Azure Developers

Developers building AI solutions on the Microsoft stack

.NET / Python Devs

Engineers integrating Azure AI into existing applications

Power Platform Devs

Makers adding AI to Power Apps, Automate, and BI

Cloud Architects

Architects designing Microsoft AI solutions at scale

Learning Outcomes

- 1 **Master Azure OpenAI Service** — deploy models, implement chat completions, function calling, streaming, embeddings, and content safety filters
- 2 **Build with Azure AI Foundry** — create AI projects, deploy prompt flows, evaluate models, and manage the end-to-end AI development lifecycle
- 3 **Implement enterprise RAG** — Azure AI Search with semantic ranking, hybrid search, vectorization, and integration with Azure OpenAI for grounded responses
- 4 **Deploy Copilot Studio agents** — build custom agents with topics, plugins, Dataverse connectors, Power Automate flows, and MCP server integration
- 5 **Process documents with AI** — Azure Document Intelligence for forms, invoices, IDs, receipts, and custom document models with Azure AI Vision
- 6 **Automate with Power Platform AI** — AI Builder in Power Apps, intelligent automation with Power Automate, and Copilot in Power BI

Prerequisites

Python or C# programming experience, basic Azure familiarity (portal, resource groups), REST API knowledge. An Azure subscription with OpenAI access is recommended (trial accounts work for labs).

5-Day Curriculum

Entirely hands-on with Azure portal and SDK labs. Schedule and session order are fully customizable based on your organization's needs and time zones.

01

Azure OpenAI Service — From Setup to Production

LIVE CODING + HANDS-ON LABS

SESSION A

Azure OpenAI Fundamentals

- Azure OpenAI vs OpenAI: enterprise security, compliance, SLAs
- Deploying GPT-4o, GPT-4 Turbo, and embedding models
- Chat Completions API: system prompts, temperature, tokens
- Lab: Deploy Azure OpenAI and build your first chat application
- Content Safety filters and Responsible AI configuration

SESSION B

Advanced Azure OpenAI Patterns

- Function calling and tool use with Azure OpenAI
- Streaming responses and async patterns
- Embeddings: text-embedding-ada-002 and text-embedding-3
- Lab: Build a function-calling assistant that queries APIs
- Lab: Build a semantic search engine with Azure OpenAI embeddings

02

Azure AI Foundry & RAG with AI Search

HANDS-ON LABS + ARCHITECTURE WORKSHOP

SESSION A

Azure AI Foundry Platform

- AI Foundry: projects, connections, deployments, evaluations
- Prompt Flow: building, testing, and deploying prompt chains
- Model catalog: Azure OpenAI, Hugging Face, Meta models
- Lab: Build and deploy a prompt flow for document summarization
- Lab: Evaluate model performance with AI Foundry metrics

SESSION B

RAG with Azure AI Search

- Azure AI Search: indexes, skillsets, semantic ranking
- Integrated vectorization with Azure OpenAI embeddings
- Hybrid search: keyword + vector + semantic reranking
- Lab: Build a RAG pipeline — ingest documents, index, and query
- Lab: Build an enterprise knowledge assistant with citation tracking

03

Copilot Studio, Agents & MCP Integration
HANDS-ON LABS + AGENT DEVELOPMENT WORKSHOP**SESSION A****Microsoft Copilot Studio Deep Dive**

- Copilot Studio architecture: topics, entities, plugins
- Building custom agents with generative AI capabilities
- Connecting to Dataverse, SharePoint, and external APIs
- Lab: Build a customer service agent with knowledge grounding
- Lab: Build an HR policy assistant with document search

SESSION B**MCP Servers & Enterprise Agent Patterns**

- Model Context Protocol: tools, resources, prompts
- Building MCP servers with Python and FastAPI for Copilot Studio
- Azure AI Agent Service for multi-agent orchestration
- Lab: Build an MCP server connecting Copilot to Azure SQL
- Lab: Deploy an agent with Power Automate approval workflows

04

Document Intelligence, Vision & Cognitive Services
HANDS-ON LABS + INDUSTRY PROJECTS**SESSION A****Azure Document Intelligence**

- Prebuilt models: invoices, receipts, IDs, business cards
- Custom models: training with your own document types
- Layout analysis: tables, key-value pairs, handwriting
- Lab: Build an invoice processing pipeline
- Lab: Build a KYC document extraction system for banking

SESSION B**Azure AI Vision & Speech**

- Azure AI Vision: image analysis, OCR, face detection
- Custom Vision: train image classifiers for domain-specific tasks
- Azure Speech: speech-to-text, text-to-speech, translation
- Lab: Build a product quality inspection system with Custom Vision
- Lab: Build a multilingual voice assistant with Speech + OpenAI

05

Power Platform AI, Semantic Kernel & Capstone
CAPSTONE PROJECT + ARCHITECTURE REVIEW + PRESENTATIONS**SESSION A****Power Platform AI & Semantic Kernel**

- AI Builder: document processing, text recognition, prediction
- Copilot in Power BI: natural language queries, smart narratives
- Semantic Kernel: plugins, planners, memory for .NET and Python
- Lab: Build an AI-powered Power App with AI Builder
- Lab: Build a planning agent with Semantic Kernel + Azure OpenAI

SESSION B**Capstone: Enterprise Microsoft AI Solution**

- Team project: End-to-end Microsoft AI solution
- Azure OpenAI + AI Search + Copilot Studio + Power Platform
- Architecture review: security, networking, cost, governance
- Team presentations and expert feedback
- Microsoft AI certification paths and next steps

Flexible & Customizable: Session order, timing, depth, and industry focus can be tailored to your organization's specific requirements. Content is regularly updated to reflect the latest Microsoft AI developments.

Microsoft AI Services Covered

All services used hands-on with Azure portal and SDK labs

Azure OpenAI Service

Azure AI Foundry

Azure AI Search

Microsoft Copilot Studio

Azure Document Intelligence

Azure AI Vision

Azure Speech

AI Builder

Semantic Kernel

Power Automate

Power BI + Copilot

Dataverse

MCP Servers

Azure AI Agent Service

Content Safety

What You Take Home

**7 AI Projects**
Complete code — chat app, RAG assistant, Copilot agent, MCP server, document pipeline, vision system, Semantic Kernel agent

**Azure AI Architecture Guide**
Reference architecture patterns for enterprise AI: networking, security, RBAC, private endpoints, cost optimization

**Deployment Templates**
ARM/Bicep templates for Azure OpenAI, AI Search, and Cognitive Services deployment with best practices

**Microsoft AI Decision Tree**
Framework for choosing between Azure OpenAI, Copilot Studio, AI Builder, and custom development for each use case

Certification of Completion

**Gennoor Tech — Certificate of Completion**
Upon completing all 5 days (40 hours), each participant receives a **Gennoor Tech Certificate of Completion** in "Microsoft AI for Developers". Digitally signed by the Founder & Director. Validates proficiency in Azure OpenAI, AI Foundry, Copilot Studio, AI Search, Document Intelligence, and enterprise Microsoft AI architecture.

Recommended Microsoft Certifications

Microsoft AI-103
Azure AI App & Agent Developer Associate

Microsoft AB-100
Agentic AI Business Solutions Architect

AI-3026
Develop AI Agents on Azure

AI-050
Develop Generative AI Solutions

Designed & Delivered By

Jalal Ahmed Khan
Founder & Director, Gennoor Tech Private Limited

Microsoft Certified Trainer (MCT) since 2022 with **16+ active Microsoft certifications** including AB-100, AB-730, AB-731, AI-103, AI-300, AZ-400, AZ-204, AZ-305, PL-400, PL-200, and PL-300. Delivered 80+ Microsoft AI training programs for enterprise clients including Microsoft, EY, IBM, Boeing, and MCIT Saudi Arabia.

Built and open-sourced the **Azure SQL MCP Server** for Copilot Studio and production Copilot agents with Dataverse integration. Senior AI Consultant with 14+ years experience across 6+ countries. **M.E. Mechanical Engineering**, Mumbai University.

Delivery Options

 **On-Site** — customized at your office |  **Virtual Live** — interactive via Teams/Zoom |  **International** — GCC, Africa, APAC, UK
